Darrell Banks

AI-Powered Principal Software Engineer

Denver Metropolitan Area

Summary

I'm a pragmatic leader who specializes in crafting delightful user experiences, and helping engineers to reach their full potential. I bring an enormous amount of passion, truly full-stack engineering experience, and deep web expertise.

Experience

RVO Health

4 years 9 months

Principal Software Engineer

August 2025 - Present (6 months)

Denver, Colorado, United States

- Architected and led frontend development of scalable healthcare applications using React and Next.js, improving accessibility and workflow efficiencies
- Spearheaded AI-integrated UX initiatives, designing intelligent, adaptive interfaces that personalize the consumer healthcare journey.
- Championed UI/UX improvements across several platforms, resulting in enhanced usability for medical professionals.
- Collaborated with cross-functional teams including product, design, and compliance to ensure HIPAA-compliant frontend implementations and secure data handling practices.
- Mentored senior and junior engineers through code reviews, technical design sessions, and frontend best practices, fostering a culture of engineering excellence.

Staff Software Engineer

May 2021 - August 2025 (4 years 4 months)

Ink.sh

Founder

October 2025 - Present (4 months)

Solo engineer & founder at Ink.sh

Changeset.io

Founder

January 2023 - Present (3 years 1 month)

Denver, Colorado, United States

Empowering velocity-minded engineering teams through pull request automation

InVision

Lead Software Engineer

September 2019 - May 2021 (1 year 9 months)

Remote

Building the World's greatest design & prototyping software using React, Angular, Node.js, Golang, and Docker.

Weedmaps

Lead Software Engineer

July 2017 - September 2019 (2 years 3 months)

Remote

Lead frontend engineer using Angular, React, MobX, and Next.js to champion social change and help good people find the best medicine.

InVisionApp Inc

Senior Software Engineer (remote)

December 2015 - July 2017 (1 year 8 months)

Greater Denver Area

Mostly Golang API engineering. Also contributed to the React and Angular front end.

SolidFire, Inc. (Acquired by NetApp)

Full-Stack Web Developer

July 2014 - December 2015 (1 year 6 months)

Boulder, CO

Web development working with Angular.js

Kapsl

Founder

June 2012 - June 2014 (2 years 1 month)

Westminster, CO

I am the sole developer / marketer and hat wearer at Kapsl.com

Mocavo.com

Web Engineer

February 2013 - February 2014 (1 year 1 month)

Boulder, CO

(Company was acquired by FindMyPast)

Front end and back-end development using PHP / Codeigniter, Angular.js, Backbone.js, and JQuery

ShopZui Inc

Lead Web Developer

July 2011 - July 2012 (1 year 1 month)

Handled front and back-end code using HTML5, CSS, JavaScript, Python, and Django.

Manage a team to ensure rapid development turnaround.

Administered and maintained multiple Linux servers.

Implemented social services and integrated shopzui.com with Facebook, Pinterest and other social media outlets.

Contributed to shopzui.com's open source efforts.

Helped get small team up to speed with SVN and GIT while re-organizing the agile process to better match the company's goals.

Administered MySQL database using MySQL Workbench and a Linux command line.

RIGHT BRAIN MEDIA

Lead Web Developer

August 2010 - July 2011 (1 year)

Brought legacy company products up-to-date with HTML5 and the use of JavaScript frameworks.

Managed and implemented several plugins for the DotNetNuke framework.

Built and maintained several custom JQuery plugins

Worked closely with a designer to brainstorm, develop and implement new projects from scratch.

Worked on a 3 man team where I was responsible for providing guidance and insight regarding choices of technology.

Education

Seminole State College of Florida

Computer Programming, Specific Applications · (2011 - 2012)
